## **Time Transport, Inc. honored by Wisconsin Clean Cities, MillerCoors**

FRANKSVILLE, WISCONSIN — Time Transport, Inc. was honored by Wisconsin Clean Cities and MillerCoors for sustainable transportation efforts and delivery service efficiency in separate events earlier this year, the company announced this week.

Earlier this month, Time Transport, Inc. received the Wisconsin Clean Cities Forward Fleet Award in recognition of the company's use of alternative fuels and sustainable transportation options to reduce petroleum use.

More than 87 percent of Time Transport's fleet is now powered by compressed natural gas. Of its 53 units, 46 are compressed natural gas-powered. The company strives to have 100 percent of its fleet powered by compressed natural gas by year's end.

Time Transport, Inc. is a member of Wisconsin Clean Cities. Wisconsin Clean Cities is a member-based nonprofit coalition focused on sustainable transportation in Wisconsin. WCC is one of nearly 100 coalitions across the country that are affiliated with the U.S. Department of Energy's Clean Cities program, which brings together stakeholders to increase the use of alternative fuel and sustainable transportation technologies, reduce idling and improve fuel economy and air quality in the entire state of Wisconsin.

"Time Transport is a valued Wisconsin Clean Cities member and partner," Wisconsin Clean Cities Executive Director Lorrie Lisek said. "Their sustainable transportation programs are making a difference in Wisconsin and we thank them for their efforts."

MillerCoors Procurement in May conducted its 7<sup>th</sup> Annual Supplier Recognition Awards at its Chicago headquarters. Time Transport, Inc. received the 2016 Regional Logistics & Transportation Supplier of the Year award and was one of 11 award recipients.

"We feel very honored to be recognized at the top, among peers, for daily transportation of the MillerCoors product," Time Transport, Inc. president Jerry Buchmeier said. "We thank them for this honored recognition."

The award followed an analysis of metrics of contract transport service with a special emphasis on on-time pick-ups and deliveries. Time Transport, Inc. reported greater than 98 percent on-time service.

“Obviously we all think this is well deserved as the performance and metrics have proven that Time (Transport, Inc.) is the right choice for (the award),” Jake Kilgore, transportation manager for MillerCoors said.
