

Ho-Chunk Gaming Wisconsin Dells Offers Public Electric Vehicle Charging Stations

FOR IMMEDIATE RELEASE
May 12, 2023

Baraboo, Wisconsin - One of Wisconsin's largest and fastest public electric vehicle (EV) charging stations will be available at Ho-Chunk Gaming Wisconsin Dells before Memorial Day weekend. A ribbon cutting event will take place on Wednesday, May 17th, at 1 p.m. in the parking lot.

In collaboration with Alliant Energy and Inertial Electric, two ABB Terra 184 fast-charging stations with 180 kilowatt DCFC dual-port charging stations offer both a traditional charging option with pull-in parking as well as a unique pull-through station which allows easy charging for large vehicles pulling trailers. Both are ADA compliant designed and available 24/7 in the parking lot off County Rd. BD, about 2 miles south of Interstate 90/94, Exit 92.

"We are extremely excited about offering these EV stations for guests to the Wisconsin Dells and Baraboo areas," said Ho-Chunk Gaming Wisconsin Dells Executive Manager Landon Owen. "We invite EV users to stop by for a charge, grab a bite to eat and perhaps play a little while." The casino will establish competitive rates for EV charging and create promotions to encourage visits inside the property.

As Ho-Chunk Gaming Wisconsin Dells considered the installation of EV charging stations, one of the first steps was partnering with Wisconsin Clean Cities and connecting with Alliant Energy.

"At Alliant Energy, we partner with communities and businesses interested in installing EV charging stations and have a variety of resources to help make the process easier," said Michelle Yun, Senior Manager Strategy & Electrification, Alliant Energy. "We are proud to partner on this project as our electrification initiatives embrace technology that enhances our purpose-driven strategy to serve customers and build stronger communities.

Understanding where these vehicles are, how and when drivers are charging and the impacts on the distribution system are important to Alliant Energy as the company plans and prepares for additional EVs on the electric grid.

Electric technologies have lower fuel and maintenance costs, fewer emissions and reduced noise levels compared to their gasoline, diesel or propane counterparts. By adopting electrification and innovation, Alliant Energy aims to move the needle toward a more sustainable future. By the end of 2030, the company's active light-duty fleet will be electric.

Address for these EV stations is: s3214 County Rd. BD, Baraboo, WI 53913.
