Wisconsin Flies to Washington to Advance Clean Fuels

Brad Schmoll (Wisconsin Clean Cities Co-Chair and Director of Alternative Energy at CMD Corporation) flew with coworker Austin Laber (Sales Representative), Graham Barker (Director of the US Eastern Region & International Sales with ANGI Energy Systems) and Fred Schnook (WCC Executive Director) recently attended the Transportation Energy Partners Summit in Washington D.C.

In addition to gaining a wealth of information via the innovative workshops focused on policy and funding availability, the four had visits on Capitol Hill with **Congressional Representatives Tony Wied, Mark Pocan, Derrick Van Orden, Scott Fitzgerald, Gwen Moore and Senators Ron Johnson and Tammy Baldwin's staff.**

Overall, Wisconsin's federal representatives were supportive of Wisconsin's Clean Cities' mission of growing alternative fuel adoption in Wisconsin. Alternative fuels promote energy security, economic growth of locally owned business, and saves consumers money over the life of their alternative fuel vehicles. **While many Department of Energy programs are currently frozen, Wisconsin's elected representatives were hopeful that is just a temporary condition which will be alleviated in the next few months.**

Transportation Energy Partners (TEP) convenes the nation's 75 Clean Cities and Communities coalitions with the clean transportation industry to advance policies that reduce American dependence on petroleum-based fuels. View the agenda of the 2025 Energy Independence Summit to understand the various workshops and topics addressed.

Wisconsin Clean Cities is committed to using the new information gained and partnerships formed during this summit, to advance the use of alternative fuels in our state.
